

YY Labs CMS

SEPTEMBER 24, 2014

Create the necessary database table for the Admin login and password. For the admin login use admin740 as the password.

CMS Admin Login Screen

Create the admin login and password screen.

Edit Literature Page

Database Table needed: **Literature**

This table holds the items that need to be displayed on the Literature page: (Click Literature in the main menu of the design): <http://demo.espis1.com/YYLabs/09-11-2014/literature.html>

Columns in this table with sample data are:

DATABASE TABLE: LITERATURE

ID	Sort Order	Topic	Description	PDFList
1	2	New Developments on Single-shot fiber scope	A Singe-Shot Fiber Scope...	
2	1	Mini MBC-1	High Extinction...	NASA-Evaluation
3	5			
4	4			
5	6			
6	9	Datasheet:		Micro MBC-1web.pdf Micro MBC-2web.pdf
7	8			
8	7			
9	3			

User Form for a data entry:

Use an Editable Grid control perhaps. So the data entry form looks like the table above. Except that the ID column will not be there. Example: <https://editor.datatables.net/examples/styling/bootstrap.html>.

Sort Order: If you can avoid the sort order column and achieve sorting by dragging the rows up or down or other means, that would be good.

Topic: Plain Text

Description: HTML Text. It can have bold, bullets etc.

PDF Files: The PDF list field can contain a list of href's separated by a vertical bar.

LITERATURE PAGE

Sort Order	Topic	Description	PDF Files	Action
2	New Developments on Single-shot fiber scope	A Singe-Shot Fiber Scope...	Edit PDF List	Edit Delete
1	Mini MBC-1	High Extinction....	Edit PDF List	Edit Delete
5				
4				
6				
9	Datasheet:		Edit PDF List	Edit Delete
8				
7				
3				

Action **Edit** edits the row.

Action **Delete** deletes the row after a confirmation message (yes/no)

Edit PDF List opens a dialog where the user can upload a list of PDF files. The user builds a list that is saved in the PDFList column of the database table.

Edit PDF List

		Display Text
1	Browse File	Micro MBC-1web.pdf
2	Browse File	Micro MBC-2web.pdf
3	Browse File	Chip-MBC-Specification.pdf
4	Browse File	
..	Browse File	
..	Browse File	
20	Browse File	

Save

Save saves the list separated by vertical bar in the table. (full [<a href>](#) link)

Preview your Literature page by providing a PREVIEW link until the HTML Design is ready. Compare it with the design page.

Once you do the above I will give you details of the CMS for the other pages.
